Furniture Tipping Restraint

Young children may be injured by tipping furniture. The use of a tipping restraint is highly recommended. When properly installed, this restraint could provide protection against the unexpected tipping of furniture due to small tremors, bumping or climbing. We recommend mounting this restraint to a wall stud.

WARNING: This product is only a deterrent. It is not a substitute for proper adult supervision.

Hardware Included:

A - (2) Brackets

B - (2) Long screws

C - (2) Short screws

D - (1) Nylon strap

Installation Instructions:

1. Locate a wall stud behind your furniture. Position a Bracket (A) on the stud approximately 1" below the top of the furniture. Mark and drill pilot hole into the center of the stud with a 3/32" drill bit. Attach a Bracket (A) to the stud with the Long Screws (B) provided.
2. On the back of the furniture, the second Bracket (A) will need to be attached to the furniture frame at the top. To do this, temporarily move the furniture into its final position and mark the location of the wall's Bracket (A) on the furniture frame with a pencil.
3. Move the furniture away from the wall and place a Bracket (A) on the mark. Using the marks from the previous step as a guide, drill holes for screws with a 3/32" drill bit. Attach the bracket to the furniture with the Short Screws (C) provided.
4. Move the furniture into its final position, taking care to line up the wall bracket with the furniture bracket. Thread the Nylon Strap (D) through the Bracket as shown in the illustration. Tighten strap until snug. Do not over tighten.
