CAUTION:

- BEFORE INSTALLING FIXTURE, MAKE SURE THE POWER TO THE CIRCUIT IS TURNED OFF AT THE MAIN FUSE BOX / CIRCUIT BREAKER UTILITY BOX.

Important Safety Instructions:

- These instructions are provided for your safety. It is very important that they are read carefully and completely before beginning the assembly and installation of this lighting fixture.
- We strongly recommend that a professional electrician install all direct wire fixtures.
- THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODES BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED.
- The lighting fixture is meant for indoor use. It must be connected only to 3-wire, single-phase electrical supply systems (provided with Ground wire or equivalent protection system).
- For your safety, it is strongly recommended that two people install the lighting fixture.
- This fixture has been rated for up to twelve (12) 25-Watt maximum TYPE C standard incandescent light bulbs (not included) or twelve (12) 3-Watt LED light bulbs (not included). To avoid the risk of fire, do not exceed the recommended lamp wattage.
- The lighting fixture is meant for indoor use, DRY LOCATIONS ONLY.
- Save these instructions.

WARNING:

- To reduce the risk of fire, electrical shock or personal injury, always turn off light fixture and allow it to cool prior to replacing light bulb.
- Do not touch bulb when fixture is turned on. Do not look directly at lit bulb.
- Keep flammable materials away from lit bulb.
- This lighting fixture contains lead, a chemical known to the State of California to cause cancer, birth defects and other reproductive harm. Wash hands after installing, handling, cleaning or otherwise touching this light fixture.

Pre-assembly:

- Remove all parts and hardware from box along with any plastic protective packaging.
- Do not discard any contents until after assembly is complete to avoid accidentally discarding small parts or hardware.
- For your safety and convenience, assembly by two people is recommended.
TOOLS REQUIRED (not included):

- Step Ladder
- Escabeau
- Escalera
- Phillips Head, Flat Blade Screwdrivers
- Wire Cutter/Stripper
- Electrical tape
- Plastic Wire Nut Connectors (3)
- Mounting Screws (2)
- Phillips screwdriver
- Flathead screwdriver
- Wire cutter/stripper
- Tournevis à tête Phillips et tête plate
- Destornilladores Cabeza Phillips y Destornilladores Cabeza Planas
- Cortador de Cable
- Pince coupe-fil et pince à fil
- Pince
- Alicates
- Rubber tape
- Electrical tape

Parts Included:
- (B) Green Ground Screw (1)
- (C) Mounting Plate (1)
- (D) Threaded Rods (2)
- (F) Canopy (1)
- (G) Canopy Nuts (2)
- (H) Sockets (12)
- (I) Threaded Nipple (1)
- (J) Metal Tubes with Threaded Tube End (2)
- (K) Acryl Poles (82) (includes 2 extras)
- (L) Metal Tube without Threaded Tube End (1)
- (M) Metal Poles (80)

Hardware Enclosed:
- (A) Plastic Wire Nut Connectors (3)
- (E) Mounting Screws (2)
TO ADJUST THE SUSPENSION LENGTH OF THE FIXTURE:

Note: The adjustment or shortening of the lighting fixture’s suspension length is only needed if the factory set length is not appropriate for your installation. We recommend that you adjust the fixture to the proper desired length before cutting the electrical cord. Determine the lighting fixture suspension length from the ceiling for the product installation, allowing the extra cord length for the outlet junction box wire connections as noted below.

1. If you would like to use only one Metal Tube (L) with one Metal Tube (J), then thread the fixture 3 wire cord through the Metal Tube (L) first and then Metal Tube (J), making sure the threaded nipple joint end of Metal Tube (J) is downward. Attach the bottom threaded end of Metal Tube (J) onto the top end of Metal Tube (L) by rotating two parts clockwise until tightly secure. Then attach the bottom end of assembled Metal Tube (L) onto the Threaded Nipple (I) by turning clockwise until tight.

2. Use the remaining Metal Tube (J) as needed, to adjust the fixture’s suspension length by following the similar procedure as outlined in step 1 of this illustration.

Insert the fixture 3 wire cord through the center wiring hole of Canopy (F) and then attach the threaded nipple below the Canopy (F) onto the top end of the installed Metal Tube (J), turning clockwise until tight.

If needed, cut off the extra power cord length on the fixtures 3 wire cords so that they all are at least 6 inches (152.4 mm) long within the outlet junction box (J-box).
ASSEMBLY & INSTALLATION INSTRUCTIONS:

- SHUT OFF THE MAIN ELECTRICAL SUPPLY FROM THE MAIN FUSE BOX/CIRCUIT BREAKER.
- Carefully unpack all fixture parts and hardware and lay them on a clear workspace.
- If the parts are not already preassembled or if suspension length adjustments were not made, please use the instruction section above “To Adjust the Suspension Length of the Fixture” for the proper assembly of the Tubes (L&J) and Canopy (F) to the desired suspension length.

1. Insert the J-box wires through the center opening of Mounting Plate (C)
2. Attach the Mounting Plate (C) onto the ceiling J-box, secure the Mounting Plate (C) by turning the 2 Mounting Screws (E) clockwise until tight using a screwdriver.

Assemble each Acryl Pole (K) to each Metal Pole (M) by rotating clockwise until tight. Do not over tighten.

Separate the Mounting Plate (C) from the Canopy (F) by removing the Canopy Nuts (G). Do not discard the Canopy Nuts (G) as these will be used later.
Please read the section "To Make the Wire Connections" Below.

1. Raise the Canopy (F) up over the Mounting Plate (C), making sure the 2 Threaded Rods (D) extend through the 2 holes on Canopy (F).
2. Secure the Canopy (F) by turning each Canopy Nut (G) clockwise until tight.

Insert the specified light bulbs into the Sockets (H). DO NOT EXCEED THE SPECIFIED WATTAGE.
To Make the Wire Connections:

1. Gently pull existing wire down from the ceiling junction box and allow wires to hang. The HOT or LIVE wire is usually black. The NEUTRAL wire is usually white. Check to see if there is a ground wire that is usually green or green with a yellow stripe or exposed copper metal wire. If needed, use a pair of wire strippers to remove about 1/2 inch of insulation from each wire.

2. Carefully inspect the fixtures wires. The NEUTRAL FIXTURE WIRE is TRANSPARENT with a WHITE STRIPE. The HOT FIXTURE WIRE is TRANSPARENT without any color stripe. And the GROUND WIRE is TRANSPARENT with a GREEN STRIPE. If you have any doubt and cannot identify the power-supply wires with confidence, then we recommend that you ask an electrician and that you not continue with the installation.

3. With the help of another person to hold the weight of the fixture, attach the fixture wires to the junction box wires as shown in the illustrations.

**NOTE:**
IT IS IMPERATIVE THAT THE JUNCTION BOX IN YOUR HOME BE PROPERLY GROUNDED!
DO NOT REVERSE THE HOT AND NEUTRAL CONNECTIONS OR SAFETY WILL BE COMPROMISED.

4. Check the wiring connections and if all looks good, gently tuck the wire connections neatly into the ceiling junction box.

Care instructions:
• Wipe clean with a soft, dry cloth or static duster.
• Always avoid the use of harsh chemicals or abrasive cleaners as they may cause damage to the fixture’s finish.

Thank you for your purchase
